REPORTING

Bank of America Puts Generative AI Beside 18,000 Service Employees

July 22, 2026

By CreditUnionAI News Staff

Member Service

Generative AI

Contact Centers

Human Oversight

Bank of America has added generative AI to EricaAssist, an employee-facing service tool used by more than 18,000 representatives. The deployment gives credit unions a concrete operating model to examine: use AI to assemble guidance during a conversation while keeping the employee responsible for the interaction.

[Alerts](#)[News](#)[Insights](#)[Intelligence](#)[Episodes](#)[Subscribe](#)

credit unions already considering [AI chatbots](#) can use this deployment as a checkpoint. An institution that cannot show how its own employees verify AI guidance is not yet ready to give the same technology more direct control over member interactions.

lenders. Credit unions using either provider, or evaluating consolidated identity platforms, should request the integration roadmap, model and data migration plans, service-level commitments and notice rights before renewing. Due diligence should also test whether combining onboarding, authentication and AML functions creates concentration risk, and require continuity, audit and exit provisions during the phased integration.
